

930NL LIGHTBAR

NEOBE®/LED Lightbar Series

The 930NL series lightbars combine our NEOBE® technology with state-of-the-art LED technology to provide the most powerful emergency warning systems available. The 930NL offers fully integrated multi-level warning capabilities with unprecedented control flexibility.

Bright LED and Strobe Lamps!

TOMAR's LED lamps use TOMAR designed wide angle optic lenses along with LED collimators to produce the bright, high efficiency light beams. LED lamps combined with our Xenon strobe lamps make this an excellent lightbar of choice for highly visibility.

Available Options

Lightbars can be configured with optional Takedown, Alley lights, Work lights and Stop-Turn-Tail lights.

Lamp Configurations and Available Colors

On LED lamps, clear lenses are standard, colored lenses can be ordered on single color LED modules. Multi-colored LED modules must use clear lenses.

Electrical Specification

12-28VDC operation, 2.5 amps average (48" lightbar LED), 7 amps average @ 12.8VDC (strobe).

Warranty Information

Ten year warranty on NEOBE® power supply and two year warranty on strobe lamps. Five year warranty on LED controllers and LED modules.
