UC-LED

Undercover Insert LED Flasher

TOMAR's Concealed LEDs provide the ultimate warning light performance for low-profile and unmarked emergency vehicles. The compact LED lamp assembly is custom mounted inside new style headlight and taillight composite housings. The Concealed System features a high intensity LED lamp and a waterproof in-line control module. Each module is independently controllable, features multiple flash patterns, two modes of operation including dimming feature, synchronizable with up to 10 other light modules.
